CCR2/5
Genetic target
Catalog class (candidate)
Genetically anchored
Disease-state associated
Unresolved
Untested
Genetic mechanism
Regulatory (COLOC)
Coding (PIP ≥ 0.5)
None
Disease liability
Coding, MASLD or liver-fat GWAS
No disease association
Not classifiable
Not assessed
Bulk RNA, disease vs control
Up
No call
Not measured
Stage partition
Inside hepatocytes
Beyond cell mix
Not separable from cell mix
Unresolved
Not a replicated stage gene
